

Sound Insulation & Air Tightness Testing for Housebuilders

Anderson Acoustics

Large housebuilders face unique challenges in **delivering a pipeline of projects** with changing teams, schedules and dependencies.

We take the hassle out of pre-completion testing by working as part of your team to **keep projects on-schedule and in-budget.**

Simple and straightforward, our focus on **operational efficiency** aims to deliver lower cost certification first-time, on time, every time.

What we do

UKAS Accredited Sound Insulation Testing. Testing for Building Regulations Part E, BREEAM and other sustainability schemes.

Air Leakage Testing. ATTMA TSL1 testing for Building Regulations Part L, as well as BREEAM, SAP and SBEM assessments.

Colindale Hospital Site Redevelopment

Over **500** successful sound tests
conducted with no handover delays

💧💧 We have worked with Anderson Acoustics for almost 7 years now as our sole sound insulation test provider on **more than 30 developments**. They have been flexible, reliable and have gone the extra mile whenever challenging situations have arisen to ensure **we achieve the desired outcome** 💧💧

Fairview New Homes Ltd

How we do it

1. Pre-visit call

2.

Airborne
wall test

3.

Impact &
airborne
floor test

4.

Analysis
& report
certificate

5. Post-certification follow-up call

Why us?

Builder
friendly

Flexible
test dates

Next day

**Complaints
handling & help-
desk services**

Acoustics for a better future. An acoustics consultancy making a conscious contribution to improving quality of life and enable a sustainable future.

Great people. Driven by quality. Technically robust.

Anderson Acoustics was formed in 2006 and we have a reputation for delivering a reliable, honest, friendly and professional service.

We pride ourselves on developing an excellent understanding of our clients' needs; we work collaboratively, adding value wherever possible to secure successful and sustainable results.

With offices in London and Brighton, we are large enough to have the capacity and flexibility to meet changing requirements, yet small enough to care.

We work behind the scenes as part of your team. It's the planning and project management that makes the difference. We pro-actively verify site-readiness, train staff and coordinate site visits to reduce costs and avoid surprises.
